WORK EXPERIENCE

Meta

Data Scientist - Threads Trust and Safety

Menlo Park, CA

Mar 2026 - July 2026

- Improved Content Safety **signal coverage from 87% to 100%** by identifying stale mappings and optimizing data pipeline loads, **lifting p90 enforcement accuracy up to 10%** for real-time enforcement models
- Built **executive dashboard** tracking 'Hold the Line' and 'Reduce' **H1 2026 goals** using internal BI tools (Tableau/Looker equivalent) for **cross-functional leadership**, triggering **SEV escalations** for sustained bad-actor content spikes
- Ingested 180M+ daily events** by designing the behavioral telemetry and logging frameworks for the **Threads Composer**, transforming **raw user actions (Compose, Post, Reply)** for downstream AB testing and analytics

PayPal

Data Science Intern - Small and Medium Business Portfolio (SMB) Analytics

San Jose, CA

May 2025 - Aug 2025

- Drove **\$18M+ estimated annualized revenue lift** by designing a stratified diff-in-diff **A/B test** on ACH (bank transfer) **invoicing payments**, influencing a **nationwide rollout decision**
- Prototyped a **RAG-based LLM agent (Using LangChain, MCP Server)** translating natural-language SMB stakeholder questions into executable BigQuery SQL, with an **answer accuracy of 75%**

PayPal

Data Engineer - Finance and Analytical Data Services

Chennai, India

July 2019 - July 2024

- Architected the **data model and pipelining** for Merchant Segmentation dataset - **daily SCD Type 2 and monthly snapshots**, **deeply accelerating forecasting & budgeting** cycles among cross functional Sales, Finance, and Product teams
- Mentored an intern** in integrating Salesforce-based Merchant hierarchies into **production-grade data pipelines**, standardizing segmentation across merchant accounts, **earning him the Best Project award**
- Safeguarded **data quality across 5+ executive data pipelines** via geography and demography based **anomaly detection** ($\pm 2SD$, **day-of-week baselines**), halting processing on anomalous spikes before reaching executive dashboards
- Increased engineering **debugging productivity by 20%** by developing an **ETL visualizer in Python** that dynamically maps cross-server dependency graphs and generates unified SQL execution lineages
- Drove a 15% increase in merchant marketing engagement** by replacing a rule-based legacy Merchant Classification heuristic with a **logistic regression** model, improving **precision from 65% to 85%**

SKILLS

Programming: SQL (BigQuery, PostgreSQL, Teradata, Hive), Python (Pandas, NumPy, Scikit-Learn, Keras, PyTorch), R, Shell

Modeling: Causal Inference, Feature Engineering, Statistical Anomaly Detection, Supervised Learning, Neural Networks

Tools & Tech: GCP, AWS, Tableau, Looker, dbt, Airflow, Apache Spark, Hadoop, UC4, CI/CD, Git, Jupyter Notebooks, Docker

PROJECTS

ReadVerse: The Personalized Book Recommendation System

- Engineered an end-to-end **Neural Collaborative Filtering and Matrix Factorization model** on the GoodReads dataset, achieving **90% Recall and 77% F1-Score**, with Dropout Regularization and Adam optimization

EDUCATION

GEORGIA INSTITUTE OF TECHNOLOGY

MS in Computational Data Science & Analytics, GPA 4.0

Atlanta, GA

Aug 2024 - Dec 2025

Coursework: Conversational AI, Deep Learning, Machine Learning, Pricing Analytics

SSN COLLEGE OF ENGINEERING, ANNA UNIVERSITY

Bachelors in Information Technology, GPA 8.53/10

Chennai, India

July 2015 - May 2019

HONORS AND AWARDS

- PayPal - 'Global Star Award for H2, 2021' & 'Star of the Quarter for Q3, 2020'
- Co-Founded 'ProCoDe'** - Programming club of the Department of Information Technology at SSN College of Engineering
