EDUCATION

GEORGIA INSTITUTE OF TECHNOLOGY
Master of Science in Analytics, GPA 4.0

Atlanta, GA
Aug 2024 - Dec 2025

SSN COLLEGE OF ENGINEERING, ANNA UNIVERSITY
Bachelors in Information Technology, GPA 8.53/10

Chennai, India
July 2015 - May 2019

SKILLS

Programming: SQL (BigQuery, PostgreSQL, Teradata, Hive), NoSQL (DynamoDB), Python (Pandas, NumPy, Scikit-Learn), Shell, R
Cloud & Data: GCP, AWS, Apache Spark, Hadoop, Dimensional Modeling, Feature Engineering, Causal Inference, Data Lineage
Tools: dbt, Apache Airflow, UC4, Tableau, Looker, CI/CD, Git, Jupyter Notebooks, VS Code, Docker

WORK EXPERIENCE

Meta

Menlo Park, CA

Data Engineer - Threads Trust and Safety

Mar 2026 - July 2026

- Improved Content Safety **signal coverage from 87% to 100%** by identifying stale mappings and optimizing data pipeline loads, **lifting p90 enforcement accuracy upto 10%** for real-time enforcement models .
- Built Executive dashboard** tracking "Hold the Line" & "Reduce" Trust and Safety H1 2026 goals **for cross-functional leadership** using internal BI tools (Tableau/Looker equivalent), triggering SEVs for continuously missed goals.
- Ingested 180M+ daily events** by designing the behavioral telemetry and logging frameworks for the **Threads Composer**, productizing **raw user actions (Compose, Post, Reply)** for downstream AB testing and analytics.

PayPal

San Jose, CA

Data Science Intern - Small and Medium Business Portfolio (SMB) Analytics

May 2025 - Aug 2025

- Drove **\$18M+ estimated annualized revenue lift** by designing a stratified diff-in-diff **A/B test** on ACH (bank transfer) invoicing payments, influencing a nationwide rollout decision.
- Prototyped a **RAG-based LLM agent (LangChain, MCP Server)** translating natural-language SMB stakeholder questions into executable BigQuery SQL, with an answer accuracy of 75%.

PayPal

Chennai, India

Data Analyst - Finance and Analytical Data Services

July 2019 - July 2024

- Increased engineering **debugging productivity by 20%** by developing an **ETL visualizer in Python** that dynamically maps cross-server dependency graphs and generates unified SQL execution lineages.
- Boosted BigQuery compute efficiency by 25%** through table partitioning and clustering of high-volume merchant segment datasets, guaranteeing strict forecasting and budgeting SLAs for FP&A and cross-functional teams.
- Engineered automated **Data Quality checks** utilizing statistical anomaly detection (**$\pm 2SD$ from day of week thresholds**) to halt corrupted pipelines, preventing data drift from impacting executive-facing Tableau dashboards.
- Drove a 15% increase in merchant marketing engagement**, replacing rule based legacy Merchant Classification heuristic with a precision focused **logistic regression** model.

PROJECTS

ReadVerse: The Personalized Book Recommendation System

- Engineered an end-to-end **Neural Collaborative Filtering and Matrix Factorization model** on the GoodReads dataset, achieving **90% Recall and 77% F1-Score** , with Dropout Regularization and Adam optimization.

PriceRight: Suggesting Prices for Retail Electronic Products

- Developed an end-to-end **price prediction XGBoost model** that outperformed **baseline regression models by 8%** , engineering feature extraction to consider brand equity metrics, text specification embeddings, and market demand dynamics.

HONORS AND AWARDS

- PayPal - 'Global Star Award for H2, 2021' & 'Star of the Quarter for Q3, 2020'.
- Co-Founded 'ProCoDe'**– Programming club of the Department of Information Technology at SSN College of Engineering.
